Statewide events this quarter:	53	55	108

Types of Substances Released:

Ammonia
Ethylene Glycol

Number of Victims:

No victims reported

Types of Injuries Sustained:

No injuries sustained

Injury Outcomes:

No injuries sustained

Number of Events with Evacuations: 0

Number of People Evacuated: N/A

Interesting Events:

April 2003 – An individual was allegedly cooking methamphetamine while traveling in a vehicle on Interstate 70. Another driver attempted to merge and struck the vehicle, forcing it into the median. Fire crews on the scene noticed a strong smell of ammonia and discovered two propane-type tanks filled with anhydrous ammonia and other materials used in methamphetamine production. A hazardous materials team was called to secure the scene and the interstate was closed for two and one-half hours.
